## INTRODUCTION TO UNDERSTANDING ADULTS FROM A PSYCHOANALYTIC PERSPECTIVE

A course for child and adolescent psychotherapists working with parents and young adults (18-25) and a transition course for child psychotherapists who would like to train as an adult psychotherapist. It considers the world of adulthood. What are the similarities, what are the differences. Through reading, discussion, and clinical seminars, it explores the landscape of adult work and the adult setting. It thinks about adult preoccupations and how these differ from those of children and adolescents.
